Summary _____

Data scientist with 7 years experience and in-depth understanding of analytic methods and their implementations. Performed statistical analysis of large datasets processed with large-scale distributed computing systems. Designed and implemented scalable analytic solutions using numerical libraries, programming frameworks, and specialized code.

- **②** 2+ years of machine learning using pandas, scikit-learn, TensorFlow, OpenCV
- ∅ 7+ years of large-scale computing using LHC Grid, Open Science Grid, Mira Supercomputer, HTCondor

Skills

- **O** Languages: Analyzed and visualized high-value datasets with software packages developed in multiple languages
 - Python, C/C++, Bash, Matlab
 - Pandas, scikit-learn, TensorFlow, OpenCV
- ❷ Leadership: Led several scientific groups to achieve time-critical targets
 - Managed teams of 5-20 researchers leading to several peer-reviewed journal publications
 - Supervised **PhD and Master students** with successful thesis defenses
 - · Organized and chaired weekly meetings and delegated tasks with emphasis on individual strengths
- **Ommunication:** Excelled in written and verbal communication skills
 - Fluent in English, French, Arabic with basic skills in German
 - Presented the latest scientific advancements in particle physics at 25 notable international conferences
 - Summarized research and data analysis to non-technical audiences at various outreach activities

O Publication:

• Published 15 scientific papers in peer-reviewed particle physics and instrumentation journals

Experience _____

Deutsches Elektronen-Synchrotron (DESY)

Post-Doctoral Research Fellow

Hamburg, Germany Sep 2017 - Present

Performed likelihood-based statistical analyses on a petabyte-scale dataset, using predictive modeling algorithms

- Automated pick-and-place assembly with robotics and advanced optics to achieve micron level precision
- Achieved high accuracy pattern matching using computer vision algorithms in challenging conditions
- Administered a laboratory budget of 300k Euros coordinating a team of scientists, engineers, and suppliers

European Organization for Nuclear Research (CERN))

Doctoral Researcher

Geneva, Switzerland Jul 2015 - Aug 2017

- Designed real-time data processing algorithms with strict real-time performance to process 160 gigabytes/second
- Supervised a team of 10 scientists to ensure high-quality data recorded by the ATLAS detector at CERN

Argonne National Laboratory (ANL)

Research Fellow

Lemont, IL, United States
May 2014 - Jun 2015

• Won a \$30k US level Analysis Support Center fellowship awarded to 2 students a year to work with ANL scientists

• Simulated complex particles production and interaction using IBM Mira, one of the world's fastest supercomputers

Education

Our University of Oklahoma Ph.D. in High Energy Physics

⊘ Drexel University *B.Sc. in Physics with High Honors*

Norman, OK, United States Philadelphia, PA, United States

Activities

- **⊘** Triathlon: Competing in the Hamburg Landesliga in the 2018 and 2019 seasons
- **O Diving:** CMAS 3 star diver with TDI advanced nitrox certification
